SUMMARY

DevOps Engineer with 1.8+ years of experience deploying production-grade applications, managing CI/CD pipelines, and configuring scalable cloud infrastructure on AWS and Azure. Delivered 10+ production application deployments, including zero-downtime migrations for BAMFoods and FM Logistics. Proficient in containerization, infrastructure as code, and Linux server administration, with hands-on experience across the full deployment lifecycle, from provisioning to security hardening and incident response.

WORK EXPERIENCE

DevOps Engineer | XLNC Technologies, Mumbai

Nov 2024 - Present

- Design and maintain CI/CD pipelines using GitHub Actions and Azure DevOps for multiple live production applications.
- Lead end-to-end AWS and Azure infrastructure setup for our SaaS platform and logistics client infrastructure using Terraform, Docker, and ECS, including a full migration from AWS ECS to Azure Container Apps.
- Implement a GitHub branching strategy (develop, staging, production) with branch protection rules and PR-based deployment workflows across all projects.
- Diagnose and fix CI/CD test gates and dependency security scanning gaps that would otherwise let regressions pass silently.
- Resolve SOC2 audit findings, addressing 10+ vulnerabilities including OAuth token handling, JWT configuration, and dependency CVEs.
- Direct the Google CASA (Cloud Application Security Assessment) certification process for OAuth verification, and conduct VAPT (Vulnerability Assessment and Penetration Testing) reviews.
- Manage the mobile app release pipeline, including Firebase configuration, Google Play Store and Apple App Store developer accounts, and Apple In-App Purchase integration.
- Author and maintain ISO 27001 / ISO 27701 compliance documentation (security policies, procedures, and evidence registers), tracking progress against a 90+ item certification readiness checklist, generating supporting evidence, and coordinating stakeholder follow-ups to close outstanding items.
- Work with Microsoft Partner Center to complete Publisher Verification and API access requirements needed for enterprise app integrations.
- Configure ALB/App Gateway routing, ACM/SSL certificates, and secrets management (AWS Secrets Manager, Azure Key Vault) across 10+ production applications, with Grafana monitoring dashboards for real-time visibility.
- Oversee production PostgreSQL databases across staging and production environments.

EDI Developer | XLNC Technologies, Mumbai

Aug 2023 - Oct 2024

- Worked on EDI transactions including 810 (Invoice), 856 (Ship Notice), 850 (Purchase Order), and INVOIC formats.
- Handled EDI mapping, data transformation, and backend system integration using Cleo Integration Cloud (CIC Studio).

Software Engineer Intern | Masstech Business Solutions Pvt. Ltd., Mumbai

Apr 2023 - Jul 2023

- Assisted in developing web applications using ASP.NET, C#, and SQL Server as part of a learning-focused internship.
- Contributed to responsive UI development and SQL query optimization under guidance from senior developers.

KEY PROJECTS

Inbox-IQ, AI Email Triage SaaS

End-to-end infrastructure and DevOps owner for a production AI-powered SaaS platform that uses LLMs (OpenAI, Claude via AWS Bedrock) to classify emails, automate triage actions, and generate daily digests. Built the entire AWS infrastructure from scratch using Terraform, provisioning ECS, ALB, RDS PostgreSQL, ElastiCache, SQS, and S3, then dockerized the application and set up GitHub Actions

CI/CD with branch-protected develop, staging, and production environments. Later migrated the platform from AWS ECS to Azure Container Apps for a parallel cloud environment, and led the production go-live including DNS cutover, SSL issuance, and live Stripe and Razorpay payment integration with zero downtime. Also guided the Google CASA security certification and VAPT reviews for OAuth verification, resolved SOC2 audit findings, designed the system architecture diagram, and owned the mobile app release across Firebase, Google Play Store, and Apple App Store, including Apple In-App Purchase integration.

FM Logistics, Multi-Client AWS Infrastructure

Set up and oversaw shared AWS infrastructure for a logistics platform serving multiple enterprise clients. Provisioned RDS with a structured branching and CI/CD strategy, and ensured stable, isolated environments for each client with proper access controls.

Enterprise Application Deployment & Automation

Deployed multiple internal and client-facing production applications, including Playground, Website Auditor, AI-Auditor, Close CRM, BAMFoods, Billshaw Photography, UFC Gym Fitness, and UFC Gym Inventory Tracker, each with separate frontend, backend, and database instances. Configured SSL certificates, Linux systemd services, DACPAC-based automated database deployments, GitHub Actions CI/CD pipelines, and Grafana real-time monitoring dashboards.

EDUCATION

M.H. Saboo Siddik College of Engineering

Bachelor of Engineering, Automobile Engineering | CGPA: 8.52 | 2018 - 2022

SKILLS

AWS (EC2, ECS, ALB, RDS, ACM, Secrets Manager, Bedrock) | Azure (Container Apps, Key Vault, DevOps) | Docker | Kubernetes | Terraform | GitHub Actions | CI/CD Pipelines | Branch Protection & Git Versioning | Linux Administration | Shell Scripting / Bash | PostgreSQL | SQL Server | Grafana | OAuth 2.0 | Application Security | Python | Git | FileZilla | MobaXterm | systemd | ASP.NET / C#
